

NO SURPRISE. KNOWDELAY.

Predictions 3 days before departure

**USED BY PILOTS
NOW AVAILABLE TO ALL TRAVELERS!**

The central graphic is a dark blue background with a commercial airplane flying through a stormy sky with lightning bolts. To the right is a map of the United States with a green flight path and yellow weather prediction markers. The text "NO SURPRISE. KNOWDELAY." is at the top left, "Predictions 3 days before departure" is below the airplane, and "USED BY PILOTS NOW AVAILABLE TO ALL TRAVELERS!" is at the bottom left.

Greetings from the airline pilots at [KnowDelay](#), making travel less stressful by predicting weather-related flight delays so you can avoid them.

As we do every Sunday and Wednesday, we've **personally reviewed** the latest aviation weather forecasts and are proud to present our summary.

Snow is forecast for the major **Midwest** airports on Thursday, with delays expected. The **Northeast** can expect similar winter weather conditions as we approach Friday and into the weekend, again with associated delays. Otherwise, high pressure will dominate much of the rest of the country, with associated good weather and few delays. See the exact airports and times by visiting the [KnowDelay](#) website.

[KnowDelay](#) can also monitor your flights so you can be forwarded of any potential delay. For just \$4.99 see if your flights could be delayed. No subscription required.

The Department of Transportation estimates that **75% of delays are caused by weather**. Some delays are minor, but many are significant and result in cancellations. Whether it's the thunderstorms we'll see this week, weather can gum up your plans. [KnowDelay](#) can help you avoid those delays.

We are confident [KnowDelay](#) will make your travel smoother by avoiding weather-related flight delays.

With KnowDelay, **No surprise. KnowDelay.**
