

Our crew at KnowDelay is hoping you are enjoying the holiday season. As always, greetings from the airline pilots at [KnowDelay](#), making travel less stressful by predicting weather-related flight delays so you can avoid them.

As we do every Sunday and Wednesday, we've **personally reviewed** the latest aviation weather forecasts and are proud to present our summary.

Rain and showers will be the dominant weather concern across the upper **Northwest** for the next several days. Delays are possible. Similarly, light rain, drizzle and restricted visibility will impact much of the central US, from the **Central Plains** to the upper **Midwest** through the weekend, again with potential delays. A cold front will push this weather from the central US eastward engulf most of the eastern seaboard, from the **Extreme Southeast** to the **Northeast** as we approach the weekend. Winter weather will impact the Rockies and many of the ski destinations. The **South** is forecast to experience thunderstorms Thursday, with delays likely. See the exact airports, dates and times by visiting the [KnowDelay](#) website.

[KnowDelay](#) can also monitor your flights so you can be forwarded of any potential delay. For just \$4.99 see if your flights could be delayed. No subscription required.

The Department of Transportation estimates that **75% of delays are caused by weather**. Some delays are minor, but many are significant and result in cancellations. Whether it's the thunderstorms we'll see this week, weather can gum up your plans. [KnowDelay](#) can help you avoid those delays.

We are confident **KnowDelay** will make your travel smoother by avoiding weather-related flight delays.

With KnowDelay, **No surprise. KnowDelay.**
