Winter weather ahead

The [Department of Transportation estimates that 75%](#) of delays are caused by weather. You can avoid those weather delays by using KnowDelay, your on-time partner.

Twice a week, the [KnowDelay](#) team of experts and pilots synthesizes complex sets of data and reports to provide you a brief summary of potential flight delays. Here are the highlights from today's Flight Delay Forecast:

- A system moving across the **Midwest** right now will result in morning delays across many airports and delays on the **East Coast** tomorrow - these delays are related to ice, a very challenging type of delay
- Few delays on Friday, except some across portions of the **West Coast**
- The weekend will once again bring delays to the **Midwest** and **East Coast** associated with a large system that will include snow and ice

Visit the [KnowDelay](#) website to see exactly what airports will be impacted, and which ones will not. KnowDelay can monitor your flights so you'll be ready for any potential delay.

With KnowDelay, No surprise. KnowDelay.
