## A “spring break”

With much of the country in the midst of Spring Break, our Flight Delay Forecast reflects just that: A break from delays. This Flight Delay Forecast is valid through Sunday, April 13th:

- All the large delay-inducing systems have moved offshore and there's none on the horizon
- A slight chance of periodic delays across the **Northeast** today and tomorrow
- **Extreme Northeast** could see a few delays — associated with low visibility — on Saturday and Sunday

The Department of Transportation estimates that 75% of flight delays are caused by weather. Use **KnowDelay** to see exactly what airports will be impacted, and which ones will not. KnowDelay can monitor your flights so you'll be ready for any potential delay.

**With KnowDelay, No surprise. KnowDelay.**

Follow us on X @KnowDelay for updates and more insights.
