## A relatively quiet week

A slow-moving weather system will bring only occasional delays across the U.S. early this week. This Flight Delay Forecast is valid through Wednesday, April 30th.

- The slow-moving weather system will bring occasional delays to the **Northern Midwest** tomorrow
- As the same system moves east, we'll see a few delays across the **Central States** on Tuesday
- Wednesday will see similar delays that will extend from north to south across the eastern portion of the **Midwest**

The Department of Transportation estimates that 75% of flight delays are caused by weather. Use **KnowDelay** to see exactly what airports will be impacted, and which ones will not. KnowDelay can monitor your flights so you'll be ready for any potential delay.

**With KnowDelay, No surprise. KnowDelay.**
